PPP Canada
Quarterly Financial Report Narrative Discussion
For the three month period ended June 30, 2012

P3 Knowledge Development and Sharing

As part of PPP Canada's mandate to act as a source of expertise and advice on P3 matters, the Corporation has focused on increasing its capacity and expertise under its *P3 Knowledge Development and Sharing* business line, through the development of tools, materials and overall knowledge to support our work and that of our clients. In addition, the Corporation has developed relationships with procuring jurisdictions across all levels of government in order to share lessons learned and to promote a culture of P3s into new precincts.

Advancing Federal P3s

PPP Canada's *Advancing Federal P3s* business line continues to grow and evolve. PPP Canada committed to work with our federal partners such as the Treasury Board Secretariat and Public Works and Government Services Canada to identify P3 opportunities by delivering advice and expertise and supporting the institutional drivers of P3s. A particular focus was supporting the Treasury Board Secretariat in the Federal Screen announced in Budget 2011. PPP Canada remains committed to building an effective organization which leverages the best value for the taxpayer in public infrastructure procurements.

Since the announcement of the Federal Screen, PPP Canada has supported the Treasury Board Secretariat with the development of the Guideline to implementing Budget 2011 Direction on Public-Private Partnerships.

The Guideline has created a mandatory requirement for departments and agencies to consult PPP Canada in their screening activities, bringing greater formality to PPP Canada's activities in the federal space. To support departments and agencies in meeting the Budget 2011 screening requirements, PPP Canada has developed a screening tool and supporting guide to assist clients in determining the P3 suitability of their project and to promote consistency and comparability across projects. In addition to PPP Canada's project identification and development activities, the full implementation of the Federal Screen will be an important objective for the Federal Business line in 2012 -13.

Advancing Provincial, Territorial, Municipal and First Nation P3s

PPP Canada also continues to focus on its *Advancing Provincial, Territorial, Municipal and First Nation P3s* business line in order to position itself as an enabler of P3 projects, through the strategic use of the P3 Canada Fund by supporting projects that demonstrate the value of P3s. PPP Canada committed to a number of initiatives through the *P3 Canada Fund* including providing funding support to new and diverse projects; developing strategies for the Round Three call for projects building on experiences from early funding rounds; and developing strategies aimed at meeting the needs of municipalities.

PPP Canada
Quarterly Financial Report Narrative Discussion
For the three month period ended June 30, 2012

PPP Canada has committed \$240.403 million in funding to P3 projects which includes payments made to eligible recipients in 2011-12 of \$22.728 million. P3 projects supported to date have combined total estimated project costs of \$974.9 million and the outstanding commitments to these projects are as follows:

Chief Peguis Trail Extension - \$1.7 million
Lachine Maintenance Centre - \$24.725 million
Lac La Biche Wastewater Treatment Facility - \$3.8 million
Evan Thomas Water and Wastewater Plant - \$9.95 million
Barrie Transit Facility project - \$5.8 million
Sudbury Biosolids Management Facility - \$11 million
Vancouver Downtown Eastside Housing Renewal Project - \$29.1 million
Projects to be announced - \$131.6 million

The Corporation closed the Round Four call for proposals on June 15, 2012. In assessing proposals, PPP Canada will give priority to those projects that promote jobs and economic growth. Specifically, PPP Canada will give priority to public infrastructure in the following sectors: transportation, water/waste-water, solid waste disposal, and brownfield redevelopment.

In preparation for the launch, PPP Canada focused its efforts on educating interested jurisdictions on P3s and on the requirements of the Fund; promoting a change in culture in the approach to public infrastructure delivery; and identifying potential applicants at an earlier stage through targeted workshops. As a result of these efforts, the Corporation received a greater number of quality, P3 viable project submissions from Municipalities, First Nations, Provinces and Territories in these priority areas. A total of 56 applications were received under Round Four which is equal to more than \$14 billion in capital projects. Of these, 70% of the submissions fell within the priority sectors: water and wastewater (20% or 11 applications); solid waste (9% or 5 applications); transportation (28% or 16 applications); brownfield redevelopment (12% or 7 applications). Once again, the greatest number of applications came from the municipalities with 57% or 32 of the applications.

Over the summer, PPP Canada will go through the project screening process and applicants will be notified of the screening results in the fall. Only those projects that are screened-in will move on to the next step, the business case development phase.

Round Four project announcements are expected to be made in early to mid - 2013.

PPP Canada
Quarterly Financial Report Narrative Discussion
For the three month period ended June 30, 2012

Quarterly and Year-to-Date Results

PPP Canada forecasted \$11.75 million in operating and \$700 thousand in capital disbursements for fiscal year 2012-13 and received \$3.175 million in appropriations in the first quarter. In addition, PPP Canada expects to request payment of the appropriation for the P3 Canada Fund and invest the \$275 million in the third quarter of 2012-13.

Total spending on operations in the first quarter amounted to \$2.719 million and represents 23% of the total annual budget. Disbursements related to capital in the first quarter amounted to \$457 thousand and represent 65% of the annual budget.

Cash flows for the period reflected the ongoing operations of the organization. PPP Canada earned \$0.883 million in interest on P3 Canada Fund investments bringing the balance of the Deferred P3 Canada Fund revenue account to \$669.579 million.

Risk Analysis

Risk Management (RM) within PPP Canada is a shared process between the Corporation's management team and the Board of Directors.

Progress in establishing effective Enterprise Risk Management (ERM) systems and processes is an ongoing and important management item. Steps are being taken to continuously improve ERM capacity and capabilities within the organization and to integrate risk more systematically into planning, decision making and other business processes. Examples of this include annual updates of PPP Canada's Corporate Risk Profile (CRP) and using the results to inform strategic and business planning and decision making. The CRP presents a comprehensive overview of PPP Canada's key risk priorities as it continues its development and implementation of ERM.

PPP Canada's Board of Directors and its management will continue to promote effective RM in the organization by building on the progress made to date and strengthen the ERM process in concert with other key elements of the overall planning framework. PPP Canada will review regularly and update the CRP on an annual basis or as new risks emerge and refine supporting risk management systems and processes to ensure that the Corporation can effectively and efficiently respond to risks as they arise.

PPP Canada

Notes to Quarterly Financial Statements (unaudited)

For the three month period ended June 30, 2012 with comparative figures for 2011
(in thousands of dollars)

* These quarterly financial statements and associated notes must be read in conjunction with the most recent annual audited financial statements and with the narrative discussion included within this quarterly financial report.

1. Description of operations

On February 12, 2008, PPP Canada Inc. ("PPP Canada") was incorporated pursuant to the *Canada Business Corporations Act*. On May 8, 2008, the Governor-in-Council declared PPP Canada a parent Crown Corporation for the purposes of Part X, except section 90, of the *Financial Administration Act*.

PPP Canada was created to spearhead the Government of Canada's efforts to promote the use of public-private partnerships ("P3s") within the federal government. PPP Canada also promotes the use of P3s to other levels of government through the use of the P3 Canada Fund which was created to fund the delivery of infrastructure investments through P3s.

PPP Canada's objects as outlined in its articles of incorporation include:

- Assess P3s at the federal level in accordance with criteria established by the Treasury Board;
- Assess the suitability of P3 projects seeking funding from federal infrastructure programs in accordance with criteria established by or pursuant to Treasury Board authorities;
- Advise on the execution of P3s at the federal level;
- Manage the P3 Canada Fund in accordance with the policies and authorities established by the Treasury Board;
- Negotiate, sign and administer agreements to be funded through the P3 Canada Fund in accordance with the policies and authorities established by the Treasury Board; and
- Act as a source of expertise and advice on P3 matters.

2. Summary of significant accounting policies

These financial statements have been prepared in accordance with Canadian public sector accounting standards. For the purposes of Section PS 1201, Financial Statement Presentation, PPP Canada considers the promotion of P3s at all levels of government as its program. The significant accounting policies used in the preparation of these financial statements are as follows:

(a) Revenue recognition

- (i) Deferred P3 Canada Fund revenue

Deferred P3 Canada Fund revenue is recognized in the Statement of

Operations in the year in which PPP Canada is required to expense funds under the terms and conditions of PPP Canada Financial Agreements entered into with eligible recipients.

(ii) Parliamentary appropriations

Parliamentary appropriations for operating purposes and for the purchase of tangible capital assets are without stipulations restricting their use and are recognized as revenue in the Statement of Operations when the appropriations are authorized.

Parliamentary appropriations for the P3 Canada Fund have restrictions on their use and are recorded as Deferred P3 Canada Fund revenue which will be recognized as revenue in the Statement of Operations in accordance with accounting policy 2(a)(i) Deferred P3 Canada Fund revenue.

(iii) Interest income

Interest income earned on cash and cash equivalents is recognized as revenue in the Statement of Operations when it is measurable and has been earned.

Interest earned on P3 Canada Fund investments is credited directly to Deferred P3 Canada Fund revenue.

(b) Financial instruments

Cash and cash equivalents, P3 Canada Fund accrued interest and P3 Canada Fund investments are classified in the cost or amortized cost category. Gains and losses on these financial assets are recognized in the Statement of Operations when the financial asset is derecognized due to disposal or impairment. Sales and purchases of investments are recorded on the trade date. Transaction costs related to the acquisition of investments are included in the cost of the related investments. Amounts receivable, and accounts payable and accrued liabilities are classified in the amortized cost category.

(i) Cash and cash equivalents

Cash and cash equivalents are comprised of cash, money market securities and other investments with maturities that are capable of prompt liquidation. Investments are cashable on demand and are recorded at cost based on the transaction price on the trade date.

(ii) P3 Canada Fund investments

P3 Canada Fund investments are comprised of cash, money market securities and other investments that are capable of prompt liquidation. P3 Canada Fund investments are cashable on demand and are recorded at cost based on the transaction price on the trade date.

(iii) Amounts receivable

Amounts receivable are measured at amortized cost using the effective interest method.

(iv) Accounts payable and accrued liabilities

Accounts payable and accrued liabilities are measured at amortized cost using the effective interest method. Any gains, losses or interest expense is recorded in the Statement of Operations depending on the nature of the financial liability that gave rise to the gain, loss or expense.

(c) Employee future benefits

(i) Pension benefits

Eligible employees of PPP Canada are covered by the public service pension plan (the "Plan"), a contributory defined benefit plan established through legislation and sponsored by the Government of Canada. Contributions are required by both the employees and PPP Canada to cover current service cost. Pursuant to legislation currently in place, PPP Canada has no legal or constructive obligation to pay further contributions with respect to any past service or funding deficiencies of the Plan. Consequently, contributions are recognized as an expense in the year when employees have rendered service and represent the total pension obligation of PPP Canada.

(ii) Severance benefits

As established by the Governor in Council, the Chief Executive Officer (CEO) is entitled to severance benefits, the cost of which is accrued as the employee renders the service necessary to earn them. The projected accrued benefit obligation is determined using a projected benefit method which incorporates management's best estimate of salary, retirement age and discount rate. The majority of this benefit represents an obligation of PPP Canada assumed from the Public Service when the CEO was hired and entails settlement by future payments.

(iii) Sick leave benefits

PPP Canada provides sick leave benefits for employees that accumulate but do not vest. Sick leave credits accumulate for employees of PPP Canada as they render services at a rate of 1.25 days per month. Sick leave credits accumulate and may be carried forward from year to year however there is no cash value for sick leave upon termination. PPP Canada recognizes a liability and an expense for sick leave in the period in which employees render services in return for the benefits. The cost of the accrued benefit obligations related to sick leave entitlement earned by employees is actuarially determined using the projected benefit method prorated on service with estimates for salary increases, retirement age, mortality, incidence rate and discount rate.

(d) Tangible capital assets

Tangible capital assets are recorded at cost less accumulated amortization. Amortization is provided for over the estimated useful lives of the assets using the following annual basis rates:

Asset	Basis	Rate
Equipment	Straight-line	3 years
Computer software	Straight-line	3 years
Furniture and fixtures	Straight-line	5 years
Leasehold improvements	Straight-line	Lesser of lease term or estimated useful life

Useful lives are assessed annually and revisions to the useful life are made as required.

Amortization commences when the asset is put into use and ceases when it no longer provides any further economic benefit to PPP Canada or when it is no longer in service.

(e) Measurement uncertainty

The preparation of financial statements in accordance with Canadian public sector accounting standards requires management to make estimates and assumptions. These estimates and assumptions affect the reporting amounts of assets and liabilities at the date of the financial statements and the reported amounts of the revenues and expenses during the period. Key areas where management has made estimates and assumptions include those related to the fair value of financial instruments, useful life of tangible capital assets, the present value of employee future benefits, contractual obligations and contingent liabilities. Estimates are based on the best information available at the time of preparation of the financial statements and are reviewed regularly to reflect new information as it becomes available. Where actual results differ from these estimates and assumptions, the impact will be recorded in future periods when the difference becomes known.

3. Commitments:

Significant contractual obligations related to the P3 Canada Fund that can be reasonably estimated are as follows:

P3 Canada Fund Obligations	2013	2014	2015	2016	2017 and thereafter
As at March 31, 2012	5,100	54,775	10,300	5,000	47,700
Three month period ended June 30, 2012					94,800
Total P3 Canada Fund Obligations	5,100	54,775	10,300	5,000	142,500
